About Me

I am a performance marketer with a Computer Science degree and an MBA in Marketing. In a live Meta Ads campaign, I helped fix Meta Pixel and GTM tracking, cutting cost per lead by ~69%. On Google Ads, my CTR analysis showed local-area ads earned 3x higher CTR (16.67% vs 5.60%) and drove all 4 conversions. I bring hard skills in Meta Ads, Google Ads, GA4, and GTM, plus soft skills in analytical thinking, presentation, and team leadership. I am ready to drive data-backed growth for a performance or growth marketing team.
